Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	100,075	41.4%	5.6%	7.6%	38.2%	5.4%	0.2%	1.4%
2006	98,771	40.9%	5.9%	8.0%	37.3%	5.7%	0.6%	1.6%
2007	102,911	40.6%	6.5%	8.3%	36.7%	5.7%	0.6%	1.6%
2008	102,584	40.3%	6.7%	7.5%	37.1%	6.1%	0.8%	1.5%
2009	101,538	39.4%	7.6%	6.3%	39.1%	5.8%	0.2%	1.7%
2010	104,270	38.4%	9.2%	5.1%	40.4%	5.3%	0.1%	1.6%
2011	100,584	38.0%	10.9%	4.5%	39.3%	5.2%	0.2%	1.9%
2012	101,671	35.3%	10.5%	4.3%	43.4%	4.5%	0.2%	1.9%
2013	101,908	33.6%	7.5%	3.6%	48.7%	4.5%	0.4%	1.8%
2014	104,233	31.9%	5.8%	3.4%	53.1%	4.0%	0.1%	1.7%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	96,208	68.0%	16.7%	35.9%	44.2%	25.6%	18.4%
2006	94,371	67.5%	17.0%	37.2%	43.6%	25.4%	19.1%
2007	97,971	67.5%	18.0%	37.9%	42.6%	25.6%	19.8%
2008	96,694	67.0%	19.1%	35.4%	42.8%	26.4%	18.9%
2009	95,675	65.5%	22.1%	31.7%	45.3%	27.5%	19.9%
2010	98,570	62.6%	23.8%	28.6%	46.6%	26.4%	20.1%
2011	95,230	62.1%	26.3%	28.6%	45.6%	26.1%	22.2%
2012	96,826	59.7%	25.8%	28.4%	49.8%	25.9%	22.6%
2013	96,650	57.7%	21.0%	26.8%	54.6%	26.1%	22.1%
2014	99,316	54.4%	17.8%	26.4%	58.9%	24.1%	22.2%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	388	62.9%	3.6%	6.2%	22.9%	4.4%	*	*
2006	368	57.1%	4.1%	6.2%	25.3%	6.8%	*	*

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	374	87.7%	16.6%	31.6%	30.5%	28.3%	17.6%

2014	0-100	24.7%	17.8%	*	42.5%	*	*	11.0%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquilizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

* Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	80.6%	*	35.5%	38.7%	35.5%	*
2006	0-100	61.4%	22.8%	40.4%	49.1%	31.6%	14.0%
2007	0-100	59.7%	23.6%	23.6%	41.7%	23.6%	19.4%
2008	0-100	63.9%	20.8%	19.4%	37.5%	31.9%	13.9%
2009	0-100	66.7%	31.2%	18.3%	51.6%	26.9%	17.2%
2010	110	61.8%	30.9%	20.9%	55.5%	35.5%	18.2%
2011	0-100	53.9%	34.8%	28.1%	41.6%	29.2%	27.0%
2012	0-100	60.8%	48.1%	20.3%	40.5%	32.9%	20.3%
2013	0-100	65.9%	40.9%	23.9%	44.3%	34.1%	28.4%
2014	0-100	52.9%	30.9%	29.4%	57.4%	35.3%	29.4%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquilizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

* Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	358	67.3%	20.4%	24.9%	39.9%	29.1%	15.4%
2006	370	64.1%	24.6%	29.5%	45.1%	26.5%	21.1%
2007	498	67.3%	25.7%	33.7%	39.0%	29.1%	20.7%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	18,280	60.4%	9.7%	35.7%	53.8%	17.3%	14.0%
2006	18,331	61.0%	9.4%	38.1%	51.8%	17.4%	13.9%

2014	0-100	34.4%	18.8%	*	25.0%	18.8%	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	81.4%	20.9%	16.3%	32.6%	32.6%	16.3%
2006	0-100	61.9%	19.0%	31.0%	61.9%	19.0%	26.2%
2007	0-100	57.4%	29.8%	40.4%	51.1%	34.0%	25.5%
2008	0-100	75.6%	*	28.9%	40.0%	20.0%	17.8%
2009	0-100	67.7%	22.6%	25.8%	35.5%	*	*
2010	0-100	51.7%	27.6%	*	51.7%	31.0%	*
2011	0-100	55.6%	25.9%	*	29.6%	25.9%	*
2012	0-100	65.2%	30.4%	*	34.8%	39.1%	*
2013	0-100	56.2%	21.9%	18.8%	40.6%	34.4%	18.8%
2014	0-100	59.4%	40.6%	*	31.2%	28.1%	21.9%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Description of Admissions To BSAS Contracted Programs FY 2014

Buckland

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	46.2%	*	*	*	*	*	*
2006	0-100	46.7%	*	*	*	*	*	*
2007	0-100	*	*	*	*	*	*	*
2008	0-100	58.3%	*	*	*	*	*	*
2009	0-100	*	*	*	*	*	*	*
2010	0-100	*	*	*	*	*	*	*
2011	0-100	*	*	*	*	*	*	*
2012	0-100	*	*	*	*	*	*	*
2013	0-100	*	*	*	*	*	*	*
2014	0-100	*	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	69.2%	*	*	*	46.2%	*
2006	0-100	86.7%	*	40.0%	*	40.0%	*
2007	0-100	66.7%	*	*	*	*	*
2008	0-100	58.3%	*	*	*	*	*
2009	0-100	*	*	*	*	*	*
2010	0-100	85.7%	*	*	*	*	*
2011	0-100	*	*	*	*	*	*
2012	0-100	*	*	*	*	*	*
2013	0-100	*	*	*	*	*	*
2014	0-100	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Data and definitions as of 2015-02-11

Description of Admissions To BSAS Contracted Programs FY 2014

Carlisle

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	34.3%	*	*	48.6%	*	*	*
2006	0-100	58.8%	*	*	*	*	*	*
2007	0-100	57.9%	*	*	*	*	*	*
2008	0-100	*	*	*	*	*	*	*
2009	0-100	*	*	*	54.5%	*	*	*

2013	0-100	58.8%	*	*	*	*	*	*
2014	0-100	58.3%	*	*	29.2%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	62.9%	17.1%	31.4%	51.4%	28.6%	*
2006	0-100	81.2%	*	*	*	*	*
2007	0-100	68.4%	*	36.8%	*	*	*
2008	0-100	*	*	*	*	*	*
2009	0-100	54.5%	*	*	54.5%	*	*
2010	0-100	*	*	*	*	*	*
2011	0-100	72.7%	*	54.5%	*	*	*
2012	0-100	75.0%	*	*	*	*	*
2013	0-100	76.5%	*	*	*	41.2%	*
2014	0-100	87.5%	*	*	33.3%	29.2%	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Chatham

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	55.3%	11.8%	*	22.4%	7.9%	*	*
2006	0-100	48.4%	9.9%	*	30.8%	*	*	*
2007	104	53.8%	13.5%	*	23.1%	*	*	*
2008	0-100	54.2%	11.1%	*	29.2%	*	*	*
2009	0-100	56.6%	8.1%	*	29.3%	*	*	*
2010	0-100	55.4%	17.4%	*	20.7%	*	*	*
2011	0-100	39.6%	26.0%	*	28.1%	*	*	*
2012	0-100	46.0%	18.4%	*	20.7%	*	*	8.0%
2013	106	58.5%	9.4%	*	26.4%	*	*	*
2014	0-100	57.6%	*	*	32.9%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

* Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	77.6%	32.9%	21.1%	26.3%	22.4%	19.7%
2006	0-100	74.7%	22.0%	18.7%	36.3%	15.4%	14.3%
2007	0-100	79.6%	28.6%	21.4%	29.6%	24.5%	24.5%
2008	0-100	80.0%	24.3%	27.1%	35.7%	25.7%	14.3%
2009	0-100	79.6%	26.5%	23.5%	33.7%	23.5%	24.5%
2010	0-100	72.4%	28.7%	17.2%	25.3%	18.4%	14.9%
2011	0-100	78.1%	42.7%	24.0%	39.6%	31.2%	20.8%
2012	0-100	68.6%	34.9%	18.6%	30.2%	20.9%	26.7%
2013	101	81.2%	18.8%	5.9%	32.7%	28.7%	13.9%
2014	0-100	85.0%	11.2%	12.5%	31.2%	25.0%	13.8%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

* Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Chester

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	56.0%	*	*	*	*	*	*
2006	0-100	68.2%	*	*	*	*	*	*
2007	0-100	75.0%	*	*	*	*	*	*
2008	0-100	72.2%	*	*	*	*	*	*
2009	0-100	60.0%	*	*	*	*	*	*

2013	0-100	72.7%	*	*	*	*	*	*
2014	0-100	62.5%	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	82.6%	*	30.4%	30.4%	30.4%	*
2006	0-100	90.9%	*	31.8%	31.8%	27.3%	*

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	85.3%	20.6%	47.1%	29.4%	35.3%	*

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	92.5%	*	19.4%	10.4%	32.8%	10.4%
2006	0-100	95.6%	*	*	*	42.2%	13.3%
2007	0-100	94.1%	*	*	*	32.4%	*

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	266	72.2%	29.7%	25.9%	33.5%	23.7%	17.3%
2006	223	82.5%	26.9%	34.5%	24.7%	28.7%	16.1%
2007	242	82.2%	26.9%	28.1%	21.9%	22.7%	19.8%
2008	205	65.9%	32.7%	26.8%	25.9%	32.7%	16.6%
2009	304	70.4%	39.1%	24.0%	18.4%	29.9%	20.1%
2010	319	71.8%	42.9%	22.3%	23.8%	28.2%	25.4%
2011	336	74.1%	44.9%	26.8%	19.0%	32.4%	28.0%
2012	357	63.9%	47.1%	24.6%	41.7%	38.1%	26.1%
2013	278	73.0%	25.5%	17.6%	42.8%	30.6%	20.9%
2014	259	75.7%	24.7%	15.4%	39.0%	26.6%	22.8%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	207	75.4%	16.4%	20.8%	28.0%	32.4%	14.5%
2006	242	66.5%	20.2%	28.1%	44.2%	31.4%	18.6%
2007	236	75.0%	18.6%	35.6%	30.5%	28.8%	20.3%
2008	246	71.5%	26.4%	30.1%	26.0%	34.1%	19.9%
2009	296	66.6%	25.3%	26.0%	35.1%	31.1%	22.3%
2010	298	53.7%	29.9%	27.2%	38.3%	31.9%	27.2%
2011	261	56.7%	37.2%	21.5%	37.2%	31.0%	24.9%
2012	268	54.1%	37.3%	19.8%	35.8%	37.3%	26.5%
2013	324	53.7%	34.3%	31.8%	46.3%	39.2%	31.8%
2014	439	44.4%	20.0%	20.0%	55.8%	26.0%	24.8%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	125	71.2%	21.6%	32.0%	35.2%	33.6%	17.6%
2006	128	71.1%	15.6%	31.2%	35.9%	25.0%	14.8%
2007	126	76.2%	16.7%	28.6%	36.5%	23.8%	17.5%
2008	172	66.9%	26.7%	29.1%	37.8%	22.7%	15.7%
2009	161	63.4%	24.2%	23.6%	50.3%	35.4%	19.9%
2010	183	49.2%	38.8%	22.4%	41.5%	28.4%	27.9%
2011	193	50.3%	36.3%	21.8%	55.4%	20.7%	23.8%
2012	253	49.8%	26.9%	28.5%	68.8%	26.1%	26.5%
2013	236	47.0%	24.6%	28.4%	71.6%	26.7%	30.1%
2014	236	49.6%	17.8%	26.7%	71.6%	24.2%	29.2%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	77.8%	*	38.9%	33.3%	38.9%	*
2006	0-100	80.0%	*	*	*	*	*

2014	274	28.1%	5.8%	6.2%	54.7%	2.2%	*	2.9%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	274	64.6%	16.4%	33.9%	48.9%	27.0%	27.4%
2006	228	71.1%	21.1%	36.4%	41.2%	31.6%	25.4%
2007	314	70.7%	18.2%	43.9%	43.6%	32.8%	19.4%
2008	256	73.4%	19.5%	34.4%	34.8%	33.6%	17.6%
2009	254	73.6%	25.6%	32.7%	39.4%	34.6%	20.5%
2010	275	65.8%	28.7%	25.5%	41.8%	31.6%	20.7%
2011	303	65.7%	34.0%	25.4%	36.3%	25.4%	20.8%
2012	326	60.1%	31.9%	24.8%	46.3%	27.0%	14.1%
2013	288	61.8%	33.0%	28.1%	49.7%	29.5%	16.3%
2014	269	47.6%	23.4%	30.5%	63.9%	25.7%	19.7%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	530	69.6%	23.6%	29.6%	45.1%	28.7%	24.9%
2006	507	69.2%	24.9%	28.0%	42.4%	29.8%	22.3%
2007	374	63.1%	29.1%	30.7%	48.7%	24.6%	25.4%

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	92.9%	*	*	*	42.9%	*
2006	0-100	72.7%	*	*	36.4%	*	*

Holbrook

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	179	41.9%	7.8%	8.9%	35.8%	3.4%	*	*
2006	196	42.3%	8.2%	10.7%	32.7%	6.1%	*	*
2007	171	36.3%	8.8%	12.3%	38.6%	3.5%	*	*
2008	182	31.9%	12.6%	6.0%	45.6%	*	*	*
2009	177	26.6%	10.2%	4.0%	54.2%	*	*	*
2010	185	30.3%	11.4%	5.9%	49.2%	*	*	*
2011	207	27.1%	20.8%	*	45.9%	*	*	*
2012	229	22.3%	13.1%	2.6%	58.5%	2.6%	*	*
2013	257	24.9%	4.7%	*	63.0%	*	*	3.5%
2014	268	23.1%	5.6%	*	64.6%	*	*	4.1%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	175	70.3%	25.7%	37.1%	41.1%	24.6%	22.3%
2006	193	65.8%	26.4%	45.1%	39.4%	20.7%	17.6%
2007	167	67.1%	25.7%	44.9%	42.5%	23.4%	22.8%
2008	178	56.2%	25.8%	38.2%	50.0%	18.0%	21.9%
2009	173	57.8%	28.9%	36.4%	61.3%	21.4%	23.1%
2010	183	55.2%	30.1%	20.8%	52.5%	16.4%	14.8%
2011	197	47.7%	40.1%	20.3%	49.7%	22.8%	21.3%
2012	224	44.2%	32.1%	21.9%	65.2%	22.3%	24.6%
2013	252	48.0%	23.4%	23.4%	67.9%	25.0%	30.6%
2014	259	44.8%	20.1%	18.1%	68.3%	20.5%	32.0%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	107	82.2%	17.8%	27.1%	15.9%	22.4%	15.0%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquilizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	92.9%	21.4%	35.7%	14.3%	47.6%	14.3%
2006	0-100	80.4%	50.0%	28.3%	26.1%	39.1%	21.7%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	90.0%	*	*	*	*	*
2006	0-100	*	*	*	*	*	*

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	66.7%	24.0%	36.0%	54.7%	25.3%	26.7%

Mashpee

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	193	53.9%	10.4%	7.8%	17.6%	8.3%	*	*
2006	218	48.6%	11.5%	8.3%	22.5%	6.0%	*	3.2%
2007	235	50.2%	14.5%	8.5%	20.4%	5.1%	*	*
2008	237	54.4%	5.5%	10.1%	24.1%	4.2%	*	*
2009	263	54.8%	16.0%	3.0%	20.5%	4.2%	*	*
2010	310	44.5%	25.5%	3.9%	21.0%	2.6%	*	2.3%
2011	351	48.7%	23.4%	4.0%	18.2%	3.7%	*	1.7%
2012	320	48.1%	17.8%	3.8%	25.0%	4.1%	*	*
2013	365	40.8%	9.9%	*	43.3%	3.6%	*	1.6%
2014	256	44.1%	3.9%	3.5%	44.9%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	187	85.0%	23.0%	30.5%	25.1%	28.9%	22.5%
2006	213	76.5%	28.6%	36.6%	31.0%	27.2%	20.2%
2007	230	75.7%	27.0%	32.6%	26.5%	25.2%	13.0%
2008	226	76.1%	19.5%	31.9%	27.0%	25.2%	12.4%
2009	255	79.2%	35.7%	29.8%	26.7%	26.3%	17.6%
2010	302	66.9%	39.4%	22.5%	27.5%	28.5%	17.2%
2011	337	70.3%	38.6%	19.6%	30.6%	25.5%	16.3%
2012	316	73.7%	38.6%	22.5%	31.3%	26.9%	17.4%
2013	356	65.4%	27.0%	22.5%	51.4%	27.5%	19.7%
2014	246	63.4%	17.9%	21.1%	52.8%	17.9%	15.9%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Description of Admissions To BSAS Contracted Programs FY 2014

Medford

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	718	18.5%	16.4%	2.9%	57.1%	2.6%	*	1.8%
2006	711	19.4%	11.5%	5.6%	57.8%	3.2%	*	2.3%
2007	723	23.5%	12.2%	4.6%	54.6%	3.6%	*	1.4%
2008	670	19.6%	11.0%	4.5%	57.9%	4.0%	*	2.4%
2009	802	18.8%	10.7%	5.4%	60.2%	2.7%	*	1.7%
2010	791	19.7%	12.9%	2.4%	58.7%	2.8%	*	3.5%
2011	709	24.3%	8.5%	3.4%	57.7%	2.3%	*	3.9%
2012	804	21.1%	10.0%	2.7%	59.6%	3.1%	*	3.2%
2013	684	27.0%	7.3%	1.5%	59.5%	1.5%	*	2.8%
2014	673	27.0%	5.3%	*	61.1%	2.2%	*	3.4%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	693	47.9%	31.9%	29.4%	65.1%	27.4%	28.0%
2006	693	50.9%	27.3%	35.9%	64.2%	26.8%	26.7%
2007	695	48.8%	29.4%	31.9%	61.7%	24.5%	28.6%
2008	634	49.5%	25.6%	31.9%	61.5%	22.9%	30.9%
2009	755	48.1%	27.3%	33.1%	67.7%	27.5%	31.1%
2010	765	41.4%	29.4%	24.1%	65.4%	21.6%	32.2%
2011	685	46.1%	27.3%	25.4%	61.5%	19.6%	34.0%
2012	781	46.2%	25.6%	27.3%	64.3%	20.5%	32.3%
2013	648	45.5%	17.3%	22.7%	64.5%	19.8%	28.9%
2014	646	46.0%	15.0%	20.1%	63.9%	16.4%	32.5%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

2013	0-100	39.0%	*	*	44.1%	11.9%	*	*
2014	0-100	42.6%	*	*	44.7%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	70.5%	15.9%	27.3%	34.1%	27.3%	18.2%
2006	0-100	87.2%	*	14.9%	17.0%	38.3%	17.0%
2007	0-100	77.1%	17.1%	*	20.0%	25.7%	*
2008	0-100	78.3%	21.7%	26.1%	30.4%	37.0%	13.0%
2009	0-100	59.2%	18.4%	22.4%	46.9%	32.7%	14.3%
2010	0-100	69.0%	35.7%	28.6%	33.3%	33.3%	38.1%
2011	0-100	78.3%	15.2%	*	17.4%	26.1%	*
2012	0-100	63.5%	28.8%	26.9%	38.5%	26.9%	30.8%
2013	0-100	70.2%	22.8%	15.8%	47.4%	36.8%	21.1%
2014	0-100	64.4%	20.0%	15.6%	53.3%	15.6%	22.2%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

2013	113	59.3%	9.7%	*	27.4%	*	*	*
2014	0-100	38.1%	*	*	57.1%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	70.3%	23.4%	28.1%	40.6%	29.7%	31.2%
2006	0-100	55.6%	15.9%	28.6%	55.6%	20.6%	15.9%
2007	0-100	69.6%	17.9%	26.8%	41.1%	32.1%	23.2%
2008	0-100	63.6%	18.2%	23.6%	38.2%	32.7%	16.4%
2009	0-100	70.8%	18.5%	23.1%	41.5%	23.1%	18.5%
2010	0-100	66.7%	28.9%	28.9%	48.9%	40.0%	30.0%
2011	0-100	76.7%	14.4%	10.0%	18.9%	14.4%	10.0%
2012	0-100	75.9%	16.1%	10.3%	25.3%	31.0%	11.5%
2013	109	74.3%	18.3%	12.8%	32.1%	13.8%	17.4%
2014	0-100	57.1%	14.3%	17.9%	63.1%	23.8%	19.0%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

2014	0-100	*	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

2014	0-100	58.3%	*	*	26.7%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	118	91.5%	11.9%	17.8%	5.9%	33.1%	20.3%
2006	0-100	80.0%	20.0%	28.4%	9.5%	26.3%	29.5%
2007	0-100	85.9%	18.8%	36.5%	10.6%	29.4%	43.5%
2008	164	95.1%	18.3%	19.5%	4.9%	34.1%	38.4%
2009	118	90.7%	19.5%	18.6%	7.6%	36.4%	15.3%
2010	0-100	90.0%	14.0%	14.0%	*	36.0%	*
2011	0-100	84.5%	27.6%	20.7%	12.1%	27.6%	20.7%
2012	0-100	65.8%	55.3%	34.2%	15.8%	36.8%	34.2%
2013	0-100	51.9%	42.3%	17.3%	51.9%	26.9%	19.2%
2014	0-100	69.6%	14.3%	10.7%	30.4%	21.4%	12.5%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	2,773	66.5%	19.1%	50.1%	53.4%	27.7%	20.3%
2006	2,634	63.2%	18.3%	52.0%	53.8%	25.5%	22.2%

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	63.6%	*	*	27.3%	*	*	*
2006	0-100	83.3%	*	*	*	*	*	*
2007	0-100	60.0%	*	*	20.0%	*	*	*
2008	0-100	74.3%	*	*	*	17.1%	*	*
2009	0-100	66.7%	*	*	20.0%	*	*	*
2010	0-100	55.6%	*	*	*	*	*	*
2011	0-100	66.7%	*	*	*	*	*	*
2012	0-100	61.9%	*	*	*	*	*	*
2013	0-100	52.9%	*	*	35.3%	*	*	*
2014	0-100	50.0%	*	*	42.9%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	85.0%	*	35.0%	30.0%	35.0%	*
2006	0-100	91.7%	*	*	*	*	*
2007	0-100	86.2%	*	31.0%	20.7%	24.1%	20.7%
2008	0-100	85.7%	22.9%	22.9%	17.1%	34.3%	20.0%
2009	0-100	90.0%	23.3%	23.3%	26.7%	50.0%	*
2010	0-100	93.3%	*	*	*	*	*
2011	0-100	83.3%	*	*	*	50.0%	*
2012	0-100	89.5%	*	31.6%	*	52.6%	*
2013	0-100	88.2%	*	*	41.2%	35.3%	*
2014	0-100	57.1%	*	*	42.9%	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Description of Admissions To BSAS Contracted Programs FY 2014

Oak Bluffs

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	75.8%	6.3%	*	14.7%	*	*	*
2006	0-100	73.8%	10.0%	*	8.8%	*	*	*
2007	0-100	68.2%	9.4%	8.2%	12.9%	*	*	*

2014	0-100	73.6%	12.6%	*	8.0%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	90.2%	22.8%	22.8%	20.7%	25.0%	12.0%
2006	0-100	96.2%	19.2%	20.5%	7.7%	16.7%	11.5%
2007	0-100	80.5%	26.8%	30.5%	20.7%	34.1%	11.0%
2008	0-100	89.5%	23.3%	24.4%	22.1%	18.6%	11.6%
2009	0-100	86.7%	26.7%	20.0%	24.0%	28.0%	18.7%
2010	0-100	68.0%	22.0%	16.0%	22.0%	*	18.0%
2011	0-100	82.1%	23.1%	15.4%	17.9%	*	20.5%

Description of Admissions To BSAS Contracted Programs FY 2014

Otis

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	40.0%	*	*	*	*	*	*
2006	0-100	73.7%	*	*	*	*	*	*
2007	0-100	55.0%	*	*	*	*	*	*
2008	0-100	50.0%	*	*	*	*	*	*
2009	0-100	69.2%	*	*	*	*	*	*
2010	0-100	30.4%	*	*	43.5%	*	*	*

2014	0-100	68.8%	*	*	25.0%	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	86.7%	*	53.3%	40.0%	40.0%	*
2006	0-100	100.0%	*	*	*	33.3%	*
2007	0-100	77.8%	*	*	*	44.4%	*
2008	0-100	73.7%	*	*	*	42.1%	*

Peabody

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	739	32.7%	12.9%	7.0%	41.9%	4.1%	*	1.4%
2006	790	36.6%	12.2%	5.8%	37.1%	6.1%	*	2.2%
2007	769	32.6%	12.5%	7.5%	40.4%	5.2%	*	1.7%
2008	865	33.2%	10.4%	4.0%	45.9%	4.0%	*	2.3%
2009	854	36.3%	9.8%	4.3%	44.8%	2.9%	*	1.6%
2010	963	35.8%	11.3%	3.8%	39.3%	7.2%	*	2.6%
2011	873	31.5%	10.9%	5.6%	42.3%	7.2%	*	2.5%
2012	908	37.8%	8.9%	3.5%	43.0%	4.7%	*	2.1%
2013	962	42.3%	8.5%	2.5%	39.3%	4.4%	*	2.9%
2014	873	31.5%	7.0%	2.4%	51.3%	5.5%	*	2.3%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	709	58.8%	27.5%	30.2%	47.8%	27.4%	23.6%
2006	770	61.9%	22.7%	27.9%	43.2%	26.6%	24.3%
2007	736	60.2%	27.7%	32.5%	45.5%	26.2%	21.5%
2008	814	58.2%	25.8%	26.5%	50.1%	24.7%	21.4%
2009	812	57.4%	21.9%	27.0%	50.0%	23.8%	22.3%
2010	917	62.2%	30.2%	26.5%	45.1%	33.7%	27.3%
2011	831	56.8%	27.4%	26.7%	49.2%	27.9%	25.6%
2012	858	60.6%	24.7%	24.7%	47.3%	27.9%	24.5%
2013	911	65.1%	19.6%	22.9%	43.9%	28.8%	21.2%
2014	842	50.8%	15.4%	17.7%	55.5%	19.8%	21.0%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Description of Admissions To BSAS Contracted Programs FY 2014

Peru

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	70.0%	*	*	*	*	*	*
2006	0-100	*	*	*	*	*	*	*
2007	0-100	*	*	*	*	*	*	*
2008	0-100	50.0%	*	*	*	*	*	*
2009	0-100	72.7%	*	*	*	*	*	*
2010	0-100	42.9%	42.9%	*	*	*	*	*
2011	0-100	69.2%	*	*	*	*	*	*
2012	0-100	66.7%	*	*	*	*	*	*
2013	0-100	*	*	*	*	*	*	*
2014	0-100	*	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	90.0%	*	*	*	*	*
2006	0-100	100.0%	*	*	*	87.5%	*
2007	0-100	*	*	*	*	*	*
2008	0-100	80.0%	*	*	*	*	*
2009	0-100	81.8%	*	*	*	63.6%	*
2010	0-100	75.0%	75.0%	*	*	50.0%	*
2011	0-100	100.0%	*	*	*	*	*
2012	0-100	72.7%	*	*	*	*	*
2013	0-100	*	*	*	*	*	*
2014	0-100	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	88.9%	*	38.9%	*	33.3%	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	113	81.4%	15.0%	31.0%	30.1%	27.4%	16.8%
2006	126	74.6%	21.4%	27.8%	40.5%	31.7%	23.8%

Description of Admissions To BSAS Contracted Programs FY 2014

Richmond

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	63.2%	*	*	*	*	*	*
2006	0-100	*	*	*	*	*	*	*
2007	0-100	52.2%	*	*	34.8%	*	*	*
2008	0-100	40.0%	*	*	*	*	*	*
2009	0-100	66.7%	*	*	*	*	*	*
2010	0-100	62.5%	*	*	*	*	*	*
2011	0-100	76.2%	*	*	*	*	*	*
2012	0-100	73.3%	*	*	*	*	*	*
2013	0-100	41.7%	*	*	50.0%	*	*	*
2014	0-100	78.3%	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	89.5%	*	*	*	47.4%	*
2006	0-100	58.3%	*	*	*	*	*
2007	0-100	63.6%	31.8%	40.9%	50.0%	27.3%	*
2008	0-100	64.3%	*	*	42.9%	50.0%	*
2009	0-100	100.0%	*	*	*	*	*
2010	0-100	86.7%	*	*	*	*	*
2011	0-100	95.0%	*	*	*	*	*
2012	0-100	93.3%	*	*	*	*	*
2013	0-100	83.3%	33.3%	45.8%	66.7%	58.3%	50.0%
2014	0-100	91.3%	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	910	33.7%	7.0%	6.9%	46.6%	3.5%	*	2.0%
2006	924	35.7%	7.1%	5.4%	45.2%	4.3%	*	2.2%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	4,753	69.8%	11.0%	57.4%	51.0%	29.6%	13.5%
2006	4,663	70.5%	12.4%	57.1%	47.5%	30.1%	16.2%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	338	74.9%	22.8%	34.3%	27.8%	29.9%	16.0%

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	980	68.4%	19.1%	36.5%	42.4%	24.5%	17.6%
2006	958	66.5%	20.0%	42.2%	41.8%	26.0%	18.7%
2007	985	65.8%	25.5%	45.5%	40.2%	29.8%	22.5%
2008	967	64.6%	24.3%	38.8%	42.8%	27.5%	20.3%
2009	1,098	60.7%	29.0%	31.8%	48.2%	30.3%	20.5%
2010	1,252	57.7%	35.2%	27.2%	45.4%	29.8%	23.4%
2011	1,217	59.9%	36.7%	31.3%	45.1%	31.1%	27.0%

Description of Admissions To BSAS Contracted Programs FY 2014

Tolland

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	*	*	*	*	*	*	*
2006	0-100	*	*	*	*	*	*	*
2007	0-100	*	*	*	*	*	*	*
2008	0-100	*	*	*	*	*	*	*
2009	0-100	*	*	*	*	*	*	*
2010	0-100	*	*	*	*	*	*	*
2011	0-100	*	*	*	*	*	*	*
2012	0-100	*	*	*	*	*	*	*
2013	0-100	*	*	*	*	*	*	*
2014	0-100	*	*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	*	*	*	*	*	*
2006	0-100	*	*	*	*	*	*
2007	0-100	*	*	*	*	*	*
2008	0-100	*	*	*	*	*	*
2009	0-100	*	*	*	*	*	*
2010	0-100	*	*	*	*	*	*
2011	0-100	*	*	*	*	*	*
2012	0-100	100.0%	*	*	*	85.7%	100.0%
2013	0-100	*	*	*	*	*	*
2014		*	*	*	*	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values and due to the fact that the table above does not include those admissions who did not report past year use*

To protect client confidentiality, categories with 5 or fewer admissions are suppressed

In 2014, a new system of reporting was adopted for Methadone treatment providers. Due to this system change, the reported enrollment numbers for FY 2014 may vary from the actual number of enrollments and future reports on FY 2014 data may differ from the current report

Clients of all ages are included in these statistics

Missing/Unknown values are excluded from the data

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	234	65.8%	21.8%	25.6%	44.0%	29.5%	21.8%
2006	258	53.1%	28.7%	28.3%	55.4%	19.0%	25.2%

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	88.4%	22.1%	37.2%	26.7%	23.3%	10.5%

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquilizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non - Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

* Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	93.0%	14.0%	20.9%	16.3%	32.6%	16.3%
2006	0-100	85.0%	*	*	*	30.0%	20.0%

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	223	43.0%	18.4%	4.5%	25.1%	7.2%	*	*

Drug Use Characteristics

Primary Substance of Use

At admission clients identify a "primary drug" of use which is the substance for which they seek treatment. Table 1 shows the percent distribution by primary drug.

Table 1
Primary Drug Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	None	Other
2005	0-100	42.7%	10.7%	8.0%	26.7%	*	*	*
2006	0-100	47.0%	8.0%	9.0%	28.0%	7.0%	*	*
2007	0-100	45.1%	*	9.9%	28.6%	8.8%	*	*
2008	0-100	70.9%	12.7%	*	7.6%	*	*	*
2009	0-100	67.4%	*	*	23.3%	*	*	*
2010	0-100	67.2%	9.0%	*	14.9%	*	*	*
2011	0-100	49.3%	11.0%	*	32.9%	*	*	*
2012	0-100	44.8%	13.8%	*	32.2%	6.9%	*	*
2013	0-100	36.1%	9.6%	*	45.8%	*	*	*
2014	0-100	36.2%	*	*	50.7%	8.7%	*	*

Other includes PCP, Other Hallucinogens, Methamphetamine, Other Amphetamines, Other Stimulants, Benzodiazepines, Other Tranquillizers, Barbiturates, Other Sedatives, Inhalants, OTC, Club Drugs, Other

All Other Opioids include Non – Rx Methadone, Other Opiates, Oxycodone, Non-Rx Suboxone, Rx Opiates, Non-Rx Opiates

** Number of total admissions may be different than the reported number on the first page due to missing/unknown values for primary drug*

Past Year Substance Use

Upon entering treatment, clients are asked to report ALL substances used in the year (12 months) prior to admission. It is possible to report using more than one substance within the past year. Therefore, percentages may total more than 100%. Table 2 shows the distribution of past year drug use for all substances. It only includes those admissions that did report past year substance use.

Table 2
Past Year Substance Use Trend: FY 2005 - FY 2014

	Total Admissions *	Alcohol	All Other Opioids	Crack/Cocaine	Heroin	Marijuana	Other
2005	0-100	80.3%	16.9%	31.0%	28.2%	23.9%	14.1%
2006	0-100	71.1%	10.3%	23.7%	32.0%	23.7%	6.2%
2007	0-100	71.3%	11.5%	29.9%	34.5%	23.0%	12.6%
